# Master Informatique, 2ème année

## Modélisation et animation

## MINI-PROJET D'ANIMATION

Charron Maxime Hubert Capucine

Décembre 2022

## 1 Cas de coalescense

#### 1.1 Affichage avec l'algorithme marching tetrahedron

Figure 1: Avant collision

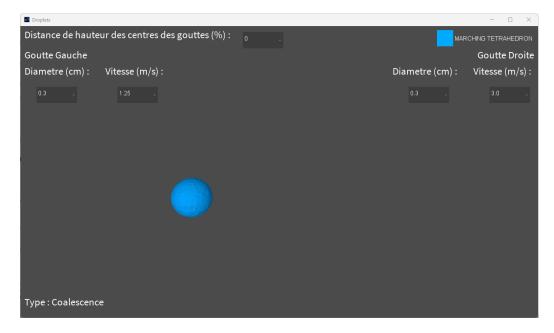

Figure 2: Après collision

## 1.2 Affichage avec des sphères

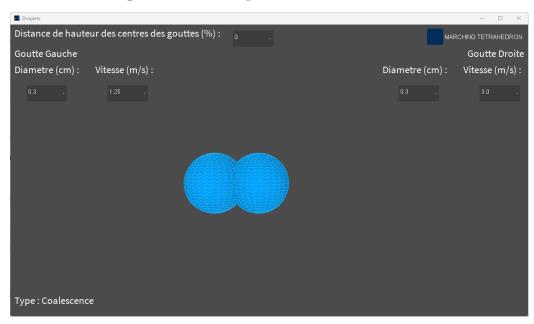

Figure 3: Avant collision

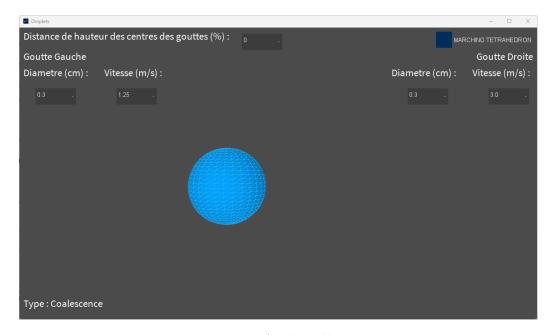

Figure 4: Après collision

## 2 Cas de reflexive separation

## 2.1 Affichage avec l'algorithme marching tetrahedron

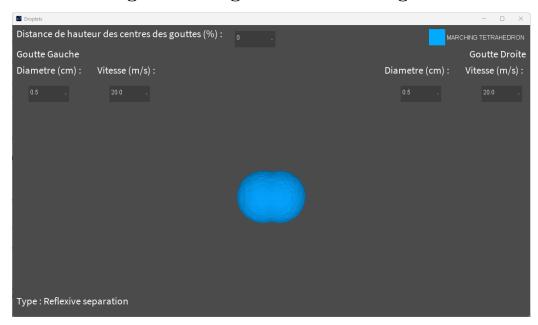

Figure 5: Avant collision

Figure 6: Après collision

## 2.2 Affichage avec des sphères

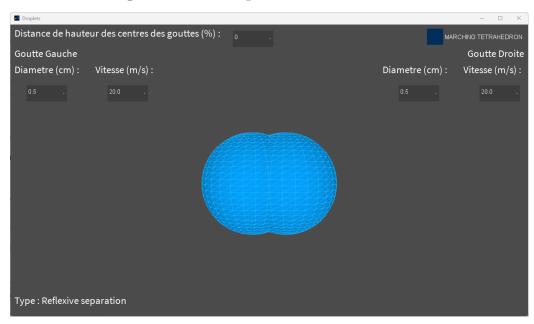

Figure 7: Avant collision

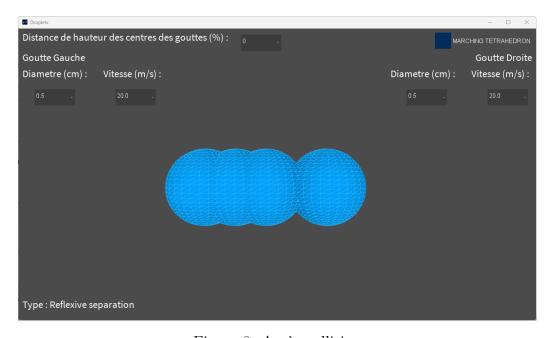

Figure 8: Après collision

## 3 Cas de stretch separation

## 3.1 Affichage avec l'algorithme marching tetrahedron

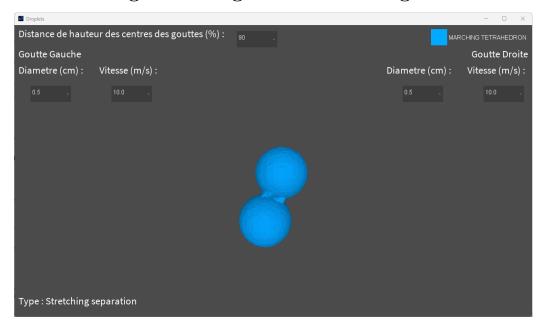

Figure 9: Avant collision

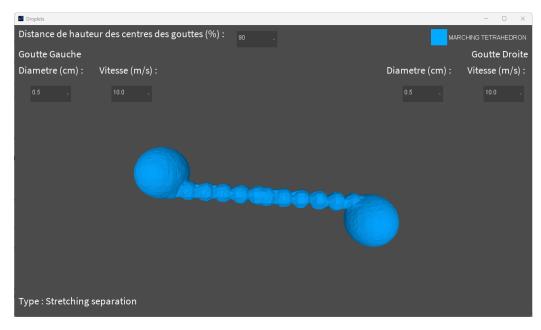

Figure 10: Juste après la collision

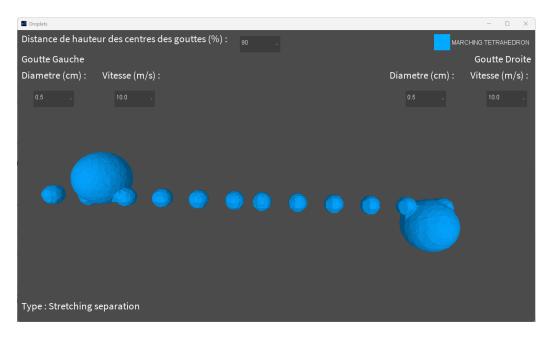

Figure 11: Bien après la collision

## 3.2 Affichage avec des sphères

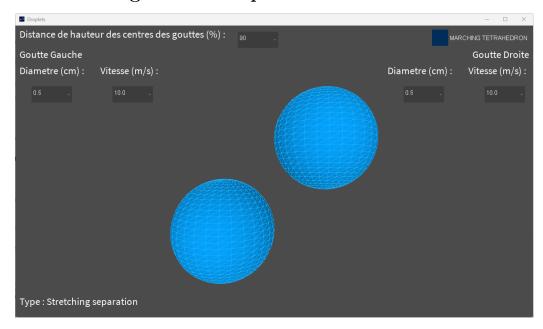

Figure 12: Avant collision

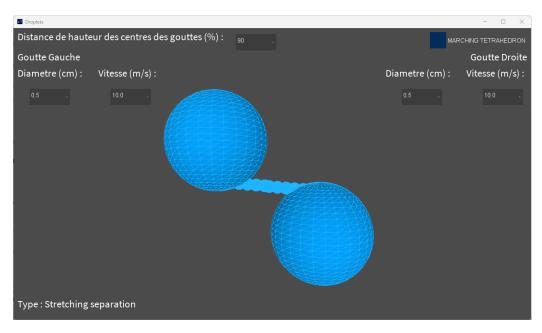

Figure 13: Juste après la collision

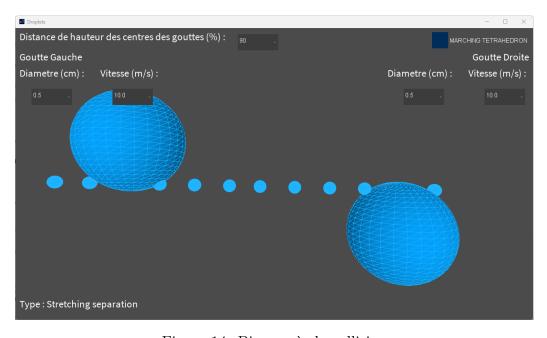

Figure 14: Bien après la collision
